ITS Project 1 - Test scenarios

Introduction

Author: xgregu02 (Sabína Gregušová)
My task was to choose one part of eCommerce platform OpenCart. I chose to test the shopping process of products as I consider it to be a very crucial aspect of any online shop.

Test scenarios for shopping cart

My default products for testing is MacBook.

Firstly, I considered all possibilities of adding MacBook to cart:

- adding directly from home page
- adding from product's page
- adding invalid number of products <-infinity, 0>
- adding non integer number of products
- adding from wish list
